Summary

Software Engineer with strong expertise in **Data Structures & Algorithms, Object-Oriented Programming (OOP), and System Design**, specializing in **scalable distributed systems and low-latency backend architectures**. Experienced in building **high-performance REST APIs, concurrent systems, and real-time applications** using **Node.js, Express, and MongoDB**. Proven ability in **performance optimization (Redis caching, database indexing), multi-threading concepts, and system scalability**. Hands-on experience with **AWS, CI/CD pipelines, and secure system design**. Strong problem-solving skills with focus on **time and space complexity optimization**.

Technical Skills

Languages: Java, Python, JavaScript, C

Backend: Node.js, Express.js, REST APIs, Microservices Architecture

Frontend: React.js, Next.js, Tailwind CSS

Databases: MongoDB, MySQL

Caching: Redis (Caching Strategies, Performance Optimization)

DevOps/Cloud: AWS (EC2), Docker, CI/CD Pipelines, Nginx, Linux, Fail2Ban

Tools: Git, GitHub, WebRTC, VS Code

Core CS: Data Structures & Algorithms, System Design, Operating Systems, DBMS, OOP

Experience

Full Stack Developer Intern — Khatakhat Logistics Pvt. Ltd., Imphal Jan–Feb 2026

- Developed **credit management system**, improving vendor efficiency by **30%+**.
- Reduced latency by **40%** using **Redis caching and real-time updates**.
- Integrated **Razorpay**, enabling secure transactions.
- Designed **real-time assignment system** using **concurrent request handling**.
- Built **scalable support system** with optimized queries and fault-tolerant design.

AI/ML Intern — Edunet Foundation (Shell + AICTE), Remote Jun–Jul 2025

- Built **CNN-based garbage classification model** (6 classes) achieving **95%+ accuracy**.
- Applied **data augmentation + preprocessing** to improve model generalization.
- Presented project findings through **technical PPT and demo** to mentors.

Open Source Contributor — GSSOC'24 EXTENDED, Remote Aug–Oct 2024

- Contributed to **10+ projects** across frontend and backend systems.
- Implemented features, resolved bugs, and improved system reliability.
- Earned **Top Contributor Certificate**.

Projects

Doctor Appointment Management System (Full Stack + Real-Time + AI) Live

- Built a **scalable healthcare platform** with multi-role architecture.
- Designed **REST APIs** with **concurrency control and rate limiting**.
- Implemented **real-time video (WebRTC)** with low latency.
- Reduced response time by **35%** via **Redis caching and query optimization**.
- Applied **database indexing** to improve **query performance**.
- Deployed on **AWS (EC2 + Nginx + CI/CD)**.
- Ensured security via **rate limiting, headers, Fail2Ban**.

Next-Gen Bharat Podcast Platform (Production) 2025

- Built a **scalable multi-role platform** with RBAC.
- Designed **real-time communication** using Socket.IO.
- Implemented **task prioritization algorithms** improving efficiency.
- Developed **modular backend architecture** for scalability.

AI Garbage Classification Model 2025

- Built an image classification system for **6 waste categories** achieving **94–95% accuracy**.
- Applied **data preprocessing and augmentation** to improve model performance.

Education

National Institute of Technology, Manipur 2023–2027

B.Tech in Computer Science and Engineering — **CGPA: 9.10**, Imphal, India

CBSE Class XII 2021–2022

85.6%, Rajasthan, India

Achievements

- LeetCode Rating: 1700+ (Solved 380+ DSA problems)
- CodeChef Rating: 1400+ (2★ Coder)
- Codathon Winner — IIIT Manipur
- Top 100 Performer — GSSOC'24 EXTENDED
- Hacksagon Finalist (Hackathon) — ABV-IIIM Gwalior (600+ teams)
- Amantya Technology Hackathon Finalist
